1. Features and Benefits

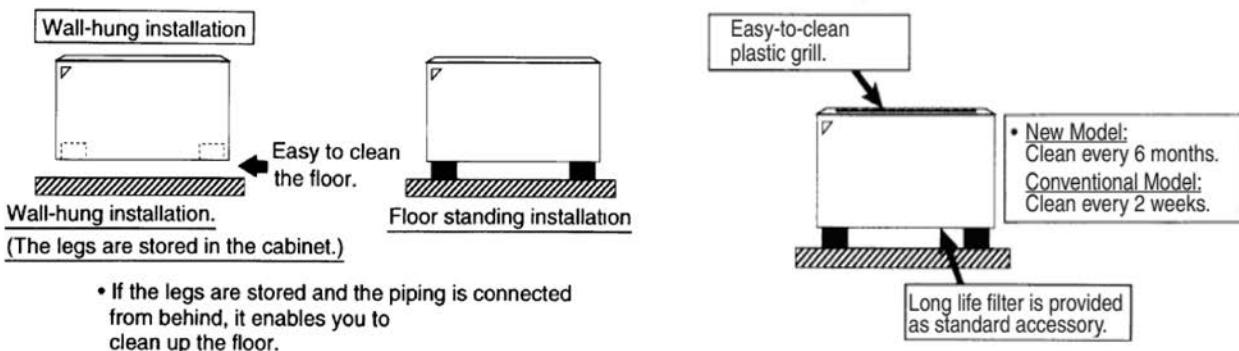

1.1 FXLQ

The floor standing unit can be installed quickly and easily in new or existing facilities in a variety of applications. Its compact design makes it suitable for perimeter zone air conditioning.

FXLQ_MVJU - Floor Standing

- Models range from 0.6 to 2 Ton
- Stylish modern casing finished in ivory white
- Ideal for installation beneath a window thanks to its low height
- One of our slimmest indoor units (less than 9") fits any interior design
- Requires minimal installation space
- Space-saving unit can be freestanding or wall-mounted
- Fitted with washable long-life filter
- Wide air discharge outlet distributes a comfortable airflow throughout the entire space
- Wall mounted installation facilitates cleaning beneath the unit where dust tends to accumulate

1.2 FXNQ

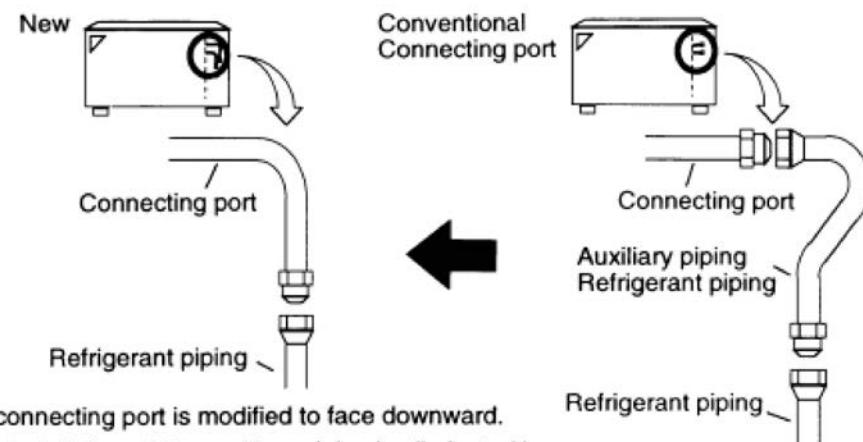

The concealed floor units cover a wide range of capacities and can be built into counter in order to maintain the aesthetics of the room.

FXNQ_MVJU - Concealed Floor Standing

- Models range from 0.6 to 2 Ton
- Ideal for installation beneath a window thanks to its low height
- One of our slimmest indoor units (less than 9") fits any interior design - only the suction and discharge grilles are visible
- Requires minimal installation space
- Fitted with washable long-life filter
- The connecting port faces downward, eliminating the need to attach auxiliary piping

- The connecting port is modified to face downward.
(The installation of the auxiliary piping is eliminated.)

MCA: Min. Circuit Amps (A)

MOP: Max. Overcurrent Protective Device (A)

kW: Fan Motor Rated Output (kW)

FLA: Full Load Amps (A)

IFM: Indoor Fan Motor

Note:

1. Voltage range

Units are designed to operate only at the rated voltage provided in the table above.

2. Maximum allowable voltage unbalance between phases is 2%.

3. MCA/MOP

$MCA = 1.25 \times FLA$

$MOP \leq 4 \times FLA$

(Next lower standard fuse rating. Min. 15 A)

4. Select wire size based on the MCA.

Note:

1. These capacity tables can be used when selecting a **VRV** indoor unit. The actual capacity of the **VRV** system depends on factors such as the selected model of outdoor units, outdoor air temperature and piping length. Please confirm that the corrected capacity of the **VRV** system satisfies the required heat load.
2. shows rated condition.

- Warning**
- Ask a qualified installer or contractor to install this product. Do not try to install the product yourself. Improper installation can result in water or refrigerant leakage, electrical shock, fire or explosion.
 - Use only those parts and accessories supplied or specified by Daikin. Ask a qualified installer or contractor to install those parts and accessories. Use of unauthorised parts and accessories or improper installation of parts and accessories can result in water or refrigerant leakage, electrical shock, fire or explosion.
 - Read the user's manual carefully before using this product. The user's manual provides important safety instructions and warnings. Be sure to follow these instructions and warnings.
- If you have any inquiries, please contact your local importer, distributor and/or retailer.

Cautions on product corrosion

1. Air conditioners should not be installed in areas where corrosive gases, such as acid gas or alkaline gas, are produced.
2. If the outdoor unit is to be installed close to the sea shore, direct exposure to the sea breeze should be avoided. If you need to install the outdoor unit close to the sea shore, contact your local distributor.
